

AT FIRST DISEGNA WAS

ALL OVER THE FLOOR...

walling
DISEGNA
European Quality Composite

Disegna WPC decking system represented a new concept in exterior design, opening a new window to creativity and providing solutions to the most challenging architecture projects, thanks to an exclusive and high-quality product. Always at the cutting edge, we are again providing solutions inconceivable until now to the world of architecture. Disegna is now climbing up the walls.

...AND NOW IT'S CLIMBING UP
THE WALLS!

THE PERFECT SOLUTION FOR THE MOST CHALLENGING PROJECTS

As a result from continuous investigation work and a meticulous manufacturing process, we make the ventilated facade system a reality. It is a high-tech, functional construction solution, made using WPC (Wood Plastic Composite), with optimal technical performance and neat aesthetic, that adapts to the needs of the most challenging applications and projects.

ADVANTAGES

- Durability
- Highest quality polymers
- Homogeneous low-porosity formula
- Colours stable over time
- High degree of thermal and acoustic insulation
- Low coefficient of expansion
- High resistance to impact
- High resistance to climate changes
- Antifungal
- Low maintenance

- Light
- Easy to install
- Sustainable and recyclable Eocomaterial

COLLECTIONS

It is a state-of-the-art material with a high aesthetic component that gives added value to the design. The wide range of colours and finishes allow endless combinations and exclusive projects that will make a difference.

CHARACTERISTICS

The Disegna Walling ventilated facade range comes in two different finishes: grooved and smooth. Each board is reversible, making it possible to choose the finish when installing it. Its installation system of male-female profiles and hidden stainless steel fixing clip, guarantees correct fixing and stability of the boards at all times.
