**1. "GREEN"** Woodpeak collection uses sustainable products. ECO Raw materials are optimised by using a thin top layer (0,6mm) of authentic wood species. In addition, we use water base stains and glues without any VOCs.

**2. ECONOMICAL.** Woodpeak prices offer authentic REAL WOOD at comparable quality laminate products.

**3. DURABILITY.** Constructed on HDF (High Density Fibreboard) substructure using SSI (Super Strong Impregnation) system. This process offers a superior abrasion and impact resistance than typical wood flooring. During the pressing process the adhesive is pressed together into the wood until the saturation level is achieved. The wood fibers absorb the lacquers making contact with the adhesive and ultimately offers a superior hardened surface seal of Micro "Corindon Particles".

**4. HYGIENIC.** Antibacterial.

**7. STABILITY.** Perfectly calibrated floorboards. All Woodpeak products use a finishing coat of varnish under the substructure for extra stability and added fire resistance.

**5. LOCKSTP.** A truly unique interlocking system. The worldwide patent LOCKSTP perfectly bonds STP products together without using adhesive.

**6. AUTHENTIC WOOD** species make every Woodpeak floors truly unique: Lightly wire brushed finish highlights the natural essence of the wood fibers.
