YOU'LL CREATE UNIQUE AND PERSONAL SPACES

The Bastone line takes the best features of WPC and uses the latest technology to create a new, cutting-edge range which offers almost endless possibilities in exterior architectural design.

It is a tubular profile system which provides added value and distinction to vertical applications such as facade fencing, shutter design, structures and delimits areas creating privacy.

High quality materials and outstanding technical qualities allow you to create personalised creative projects which enhance the architectural beauty of any building.
